# ANUPRASAD H A

Data Science & Software Engineer

anoop777gowda@gmail.com | +91 9964389605 | Mysore, India

LinkedIn | Portfolio

## PROFESSIONAL SUMMARY

Results-driven Data Science and Software Engineering professional with hands-on experience in Python, Java, Machine Learning, and Deep Learning. Proven ability to design and build end-to-end ML pipelines, real-time AI applications, and scalable data-driven solutions. Experienced in supervised and unsupervised learning, NLP, computer vision (CNN), and sequential modeling (LSTM). Currently contributing to production-level codebases as a Junior Software Engineer, bridging software development with advanced data science to deliver impactful AI solutions.

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming:** | Python, Java, SQL |
| **ML & AI Frameworks:** | TensorFlow, Keras, PyTorch, Scikit-learn, NumPy, Pandas |
| **Machine Learning:** | Predictive Modeling, Classification, Clustering, Dimensionality Reduction, Recommender Systems |
| **Deep Learning:** | CNN (Convolutional Neural Networks), LSTM (Long Short-Term Memory), Transfer Learning |
| **NLP:** | Natural Language Processing, Text Classification, Speech Recognition |
| **Data Science:** | EDA, Feature Engineering, Data Preprocessing, Model Evaluation, Cross-Validation |
| **Web & Backend:** | Flask, Streamlit, REST APIs |
| **Tools & Platforms:** | Git, Jupyter Notebook, VS Code, Google Colab |

## PROFESSIONAL EXPERIENCE

**Junior Software Engineer** | **Navabharath Technologies** *Present*

- Develop and maintain production-level software applications using Python and Java, ensuring code quality and performance.
- Collaborate with cross-functional teams to design, build, and deploy data-driven features and RESTful APIs.
- Participate in Agile code reviews, debugging sessions, and continuous integration/continuous deployment (CI/CD) processes.
- Contribute to improving application performance through profiling, optimization, and refactoring of existing codebases.

**Data Science Intern** | **A Cube – Alpha Ace Academy** *Nov 2024 – Jan 2025*

- Developed and evaluated supervised (classification, regression) and unsupervised (clustering) ML models on real-world datasets.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) using Python (Pandas, NumPy, Scikit-learn).
- Built and fine-tuned deep learning models (CNN, LSTM) achieving improved accuracy on classification and prediction tasks.
- Documented model performance metrics and presented findings to mentors and team leads, demonstrating strong analytical communication skills.

## PROJECTS

### Signs of the Palace – Real-Time Video Classifier

- Engineered an end-to-end deep learning pipeline combining CNN for spatial feature extraction and LSTM for temporal sequence modeling.
- Trained the model across 29 object categories using 75 training videos per class, achieving robust multi-class video classification.
- Deployed an interactive Streamlit web application with a Flask backend enabling real-time video predictions in the browser.

**Tech Stack:** *Python, TensorFlow, Keras, CNN, LSTM, Streamlit, Flask*

### Crop Recommendation System

- Designed and trained a multi-class ML classification model to recommend optimal crops based on soil composition, pH, and weather parameters.
- Applied feature engineering, hyperparameter tuning, and k-fold cross-validation to improve model accuracy and generalization.
- Delivered actionable agricultural insights enabling precision farming decisions based on environmental data.

**Tech Stack:** *Python, Scikit-learn, Pandas, Matplotlib*

### Vehicle Fuel Efficiency Prediction

- Built a regression model to accurately predict vehicle fuel efficiency (MPG) from engine power, RPM, displacement, and other vehicle attributes.
- Conducted comprehensive EDA and correlation-based feature selection to identify key predictors influencing fuel efficiency.

**Tech Stack:** *Python, Scikit-learn, NumPy, Seaborn*

### Speech-to-Text & Text-to-Speech System

- Developed a real-time Python application integrating speech recognition and voice synthesis for audio input/output processing.
- Implemented robust error handling, noise filtering, and voice customization features to enhance usability across use cases.

**Tech Stack:** *Python, SpeechRecognition, pyttsx3*

## EDUCATION

| Qualification | Institution | Year | Score |
|---|---|---|---|
| M.Sc (Data Science) | JSS Science and Technology, Mysuru | 2025 | 77.50% |
| BCA | BGS First Grade College | 2023 | 68.87% |
| PUC (12th) | Delta PU College | 2019 | 46.66% |
| SSLC (10th) | Pragathi Educational Institution, Saraguru | 2017 | 72.32% |

## CERTIFICATIONS & TRAINING

- Data Science Internship – A Cube (Alpha Ace Academy), Nov 2024 – Jan 2025
- M.Sc Data Science Program – JSS Science and Technology University, Mysuru (2023–2025)
